# CONTENTS TO VOLUME 22

## PART 1 MAY 1965

The stability of a horizontal fluid interface in a vertical electric field. G. I. TAYLOR and A. D. MCEWAN *page* 1

The compressible inviscid leading-edge vortex. S. N. BROWN 17

Capillary instability of a rotating jet with twisted magnetic field. PRATIBHA VERMA and Y. K. VERMA 33

The wave drag of a Hovercraft. M. J. BARRATT 39

On the development of Mach waves radiated by small disturbances. J. E. FFOWCS WILLIAMS 49

On the mathematics of fluidization. Part 2. Steady motion of fully developed bubbles. J. D. MURRAY 57

Resolution and structure of the wall pressure field beneath a turbulent boundary layer. W. W. WILLMARTH and F. W. ROOS 81

A note on shock-shock diffraction. JOHN W. MILES 95

A note on Whitham's Rule. R. F. CHISNELL 103

The effect of speed on the condensate layer on a cold cylinder rotating in a steam atmosphere. RUSSELL HOYLE and D. H. MATTHEWS 105

Waves on the erodible bed of an open channel. A. J. REYNOLDS 113

The uniform distortion of a turbulent wake. J. F. KEFFER 135

Turbulent jets in ducted streams. PHILIP G. HILL 161

A disturbance-sensitive Reynolds number range of the flow past a circular cylinder. J. H. GERRARD 187

Compressible laminar boundary-layer flow at a point of attachment. G. POOTS 197

## PART 2 JUNE 1965

On long waves on a rotating earth. LL. G. CHAMBERS 209

An experimental investigation of stability and interfacial waves in co-current flow of two liquids. M. E. CHARLES and L. U. LILLELEHT 217

The buoyant motion within a hot gas plume in a horizontal wind. G. T. CSANADY 225

Excitation of internal waves by a turbulent boundary layer. A. A. TOWNSEND 241

Diffraction of surface waves on an incompressible fluid. W. E. WILLIAMS 253

The decay of a turbulent swirl in a pipe. FRANK KREITH and O. K. SONJU 257

A general approach to linear and non-linear dispersive waves using a Lagrangian. G. B. WHITHAM 273

A three-dimensional turbulent boundary layer. A. E. Perry and P. N. Joubert *page* 285

Inviscid fluid flow in an accelerating cylindrical container. R. E. Moore and L. M. Perko 305

The investigation of a standing wave due to gas blowing upwards over a liquid film; its relation to flooding in wetted-wall columns. C. J. Shearer and J. F. Davidson 321

Properties of inviscid, recirculating flows. W. W. Wood 337

Sound radiation from turbulent boundary layers formed on compliant surfaces. John E. Ffowcs Williams 347

On two-dimensional inviscid flow in a waterfall. N. S. Clarke 359

Vortex formation in a free boundary layer according to stability theory. A. Michalke 371

The lift on a small sphere in a slow shear flow. P. G. Saffman 385

The effect of non-linearity at the free surface on flow past a submerged cylinder. E. O. Tuck 401

Note on instability of compressible jets and wakes to long-wave disturbances. A. E. Gill and P. G. Drazin 415

Reviews

*Continuous Measurement of Unsteady Flow* 416

Part 3 July 1965

Hypersonic non-equilibrium flow over slender bodies. Richard S. Lee 417

On the generation of spatially growing waves in a boundary layer. M. Gaster 433

Wall layers with non-uniform shear stress. A. J. Reynolds 443

On the general theory of contained rotating fluid motions H. P. Greenspan 449

Incompressible slip flow past a semi-infinite flat plate. J. D. Murray 463

On the curvature and torsion of an isolated vortex filament. Robert Betchov 471

A study of the turbulent separated flow region occurring at a compression corner in supersonic flow. H. McDonald 481

Surface-pressure fluctuations induced by boundary-layer flow at finite Mach number. John E. Ffowcs Williams 507

On fluid flow induced by a rotating magnetic field. H. K. Moffatt 521

The effect of rotation on the simpler modes of motion of a liquid in an elliptic paraboloid. F. K. Ball 529

The stability of an unsteady Kelvin–Helmholtz flow. R. E. Kelly 547

The distortion of a magnetic field by the flow of a conducting fluid past a circular cylinder. R. SEEBASS and K. TAMADA *page* 561

Gravitational instability of a viscous fluid in a magnetic field. CHIA-SHUN YIH 579

The three-dimensional laminar boundary layer on a flat plate. L. SOWERBY 587

Shock-shock interaction on a slender supersonic cone. VICTOR D. BLANKENSHIP 599
